Swisscanto (CH) Index Equity Fund Emerging Markets Responsible NT CHF

swisscanto

Managed by Zürcher Kantonalbank

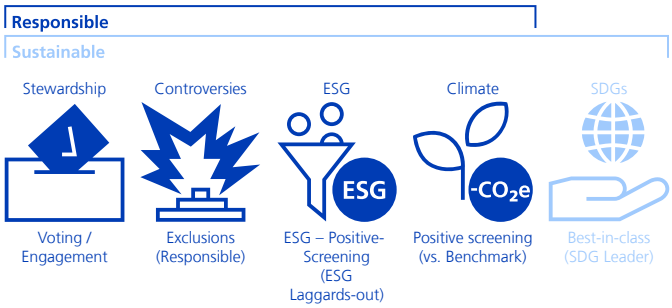
Equity | reinvesting | July 2026 - Marketing Material

Fund Description

The fund's objective is to replicate the risk and return characteristics of the benchmark index. ESG criteria (environment, social, governance) are taken into account and exclusions and CO2e optimisations are carried out. Deviations from the benchmark index are therefore possible.

Sustainability Policy

In the implementation of the sustainability policy, a distinction is made between the two characteristics 'Responsible' and 'Sustainable'. Depending on the characteristic, the sustainability approaches listed below are applied. Further information on the sustainability policy can be found in the accompanying explanations.



Notes:
- Light-coloured sustainability characteristics and approaches are not applicable to the assets in question.

Swisscanto Sustainability Rating

high A B C **D** E F G low

Profile/Suitability

This product is suitable for investors who
- have a long-term investment horizon.
- wish to participate in the development of the equity markets of developing countries and wish to benefit from the yield potential of the underlying benchmark index.

Deviations from the benchmark index can lead to overperformance or underperformance.

Explanations of the Sustainability Policy

Sustainability Policy / Sustainability Characteristics
In the implementation of the sustainability policy, two characteristics are distinguished, each applying different sustainability approaches. The 'Responsible' characteristic typically includes the application of exclusion criteria, systematic ESG analysis as an integral part of the investment process, and a reduction in the CO_2e intensity of investments. The 'Sustainable' characteristic typically includes, in addition to the aforementioned approaches, the application of even more extensive exclusions and focuses on SDG and ESG Leaders. For further information on the application of the sustainability approaches, please see the following explanations.

In Switzerland, we define consistency with sustainability objectives in accordance with the 'AMAS Self-Regulation on Transparency and Disclosure for Collective Investments with a Sustainability-Related Approach' as follows:
– Investment products with characteristic 'Responsible' through CO_2e reduction by means of the sustainability approach 'climate-alignment' (CO_2e reduction over time) and/or 'positive screening' (CO_2e intensity lower than the relevant index).
– Investment products with characteristic 'Sustainable', in addition to the approaches mentioned above, through aligning investments with the 17 United Nations Sustainable Development Goals (SDG Leaders) and/or criteria for a sustainable economic practices (ESG Leaders) by means of the sustainability approach 'best-in-class', or through aligning investments with the 17 United Nations Sustainable Development Goals (SDG Leaders) and/or thematic adopters by means of the sustainability approach 'thematic investments'.

Stewardship – Voting / Engagement
In accordance with the Engagement Guidelines of Zürcher Kantonalbank's Asset Management division, we actively engage in dialogue with the management teams of the companies. For example, companies are encouraged to set ambitious greenhouse gas reduction targets, implement them consistently and report on them transparently. Our engagement activities and guidelines are published on our website (products.swisscanto.com/products/product/documents). Voting is conducted in accordance with the Swisscanto Voting Policy, which is based on Swiss and international corporate governance principles and the United Nations Principles for Responsible Investment (UN PRI). The threshold for exercising voting rights in foreign markets is CHF 2 million per equity position. Swisscanto votes across the board on Swiss equities. The voting behaviour of Swisscanto is accessible at: swisscanto.com/voting

Controversies – Exclusions (Responsible)
In this portfolio, exclusion criteria in line with the characteristic 'Responsible' are applied. The aim is to avoid investments in controversial business activities and practices and to take these into account in the investment process by applying exclusion criteria. Such activities are identified and carefully reviewed using external data sources (e.g. MSCI ESG Research) and based on the 'Swiss Association for Responsible Investments' recommendation list. Further details can be found on the dedicated webpage on exclusion criteria, in the 'Sustainability Report' or in our document 'Exclusion criteria to avoid controversies': products.swisscanto.com/products/product/documents

ESG – ESG – Positive-Screening (ESG Laggards-out)
The systematic analysis of ESG criteria forms an integral part of the investment process. The criteria may take into account the environmental 'E', social 'S' and governance 'G' aspects. In this portfolio, the investment universe is reduced by excluding securities that perform poorly compared to their peers in terms of ESG criteria (ESG Laggards-out).

Climate – Positive screening (vs. Benchmark)
The asset manager reduces the average CO_2e intensity of the investments in indexed 'Responsible' portfolios by at least 20% compared to the benchmark index. In the case of portfolios with investments in government bonds or bonds from government-related issuers, this share is excluded from the stated target value (applicable to the portfolio and benchmark index). For this share, the asset manager aims to achieve a lower average CO_2e intensity of the investments compared to the benchmark index (without a defined minimum reduction). When calculating the average CO_2e intensities, the asset manager relies on data on CO_2e emissions in relation to revenue for companies and, for states, in relation to gross domestic product.

SDGs – Best-in-class (SDG Leader)
This approach focuses on returns through investments in companies and states with social benefits (SDG Leaders). Together with the ESG Leaders, SDG Leaders form the 'Sustainable Investment Universe'. SDG Leaders harness their innovative strength to create environmentally and socially compatible products and services. In doing so, they contribute to achieving one or more of the United Nations' Sustainable Development Goals (SDGs).

Note:
- Light-coloured sustainability characteristics and approaches are not applicable to the assets in question.

AMAS
Asset Management Association Switzerland

Scope and further information on the sustainability policy
The sustainability approaches apply to a significant proportion of the assets. Further supplementary product-specific information on these approaches and their scope can be found in the relevant legal documents at products.swisscanto.com.

CO_2e equivalents (CO_2e)
CO_2 equivalents (CO_2e) are a unit of measurement used to standardise the climate impact of greenhouse gases. In calculating CO_2e intensities, greenhouse gases with a global warming effect are included in accordance with the international "Greenhouse Gas Protocol" (GHG Protocol) standard (measured in CO_2e).

ESG
ESG stands for the aspects of environment (E), social (S) and governance (G).

Swiss Association for Responsible Investments
The Swiss Association for Responsible Investments is an association of institutional investors and was founded in 2015. The association provides its members with services for the consideration of environmental, social and economic aspects in their investment activities.

Swisscanto Sustainability Rating
The proprietary Swisscanto Sustainability Rating provides information on the current sustainability level of the portfolio. It is calculated from the values of the collective assets and individual securities contained in the portfolio and is divided into seven sustainability classes from A (highest level) to G (lowest level). To calculate the rating, companies and states are assessed on the four pillars of our sustainability research: controversial areas of business (controversy), sustainable corporate governance (ESG), greenhouse gas emissions (climate) and impact of products on the environment and society (SDG). The Swisscanto Sustainability Rating is recalculated once per quarter end. For further information, visit: products.swisscanto.com/products/product/documents

Comments to the Fund

Target Investor Group - Term
Institutional investors with necessary contract

Target Investor Group - Description
N class is offered exclusively to Zürcher Kantonalbank investors with an individual asset management agreement and institutional investors with an individual investments contract, as well as institutional investors of other partners of Swisscanto Fund Management Company Ltd. with the corresponding agreement. An additional requirement is the conclusion of a cooperation agreement. The second letter «T» indicates that the class reinvests profits (accumulating).

Flat Fee (FF)
The AIF is used to compensate the fund management company and fund administration, asset management and - if compensated - the distribution of the fund as well as the custodian bank for the services it provides.

Charging Fee N-Class
The charging fee applied to the N-Classe is shown at a rate of 0%, as the FF is charged in the context of the individual asset management agreement.

Total Expense Ratio (TER)
The Total Expense Ratio (TER) refers to the annual costs that are continuously charged to the fund's assets and is expressed as a percentage of the fund's assets. The figure corresponds to the level of the TER in the most recently completed financial year and does not guarantee a similar level in the future.

Issue and redemption charges in favour of funds ("crossing")
The fact sheet mentions the currently valid and maximum charges incurred. To protect existing investors and cover transaction costs, the fund management credits all issue and redemption charges to the respective sub-fund assets. Issue and redemption charges in favour of the fund are reduced to the extent that issues and redemptions can be offset against each other on a bank working day (known as "crossing"). As a result, charges may be reduced. For further information, see fund agreement.

Swinging Single Pricing (SSP) indirectly
According to fund master data, this fund does not exhibit any swinging single pricing (SSP). However, it cannot be ruled out that an investment is made in a target fund with SSP indirectly.

License terms of external data providers
MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This report is not approved,

endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Explanation of general risks
Investment involves risks, especially with regard to fluctuations in value and return. Investments in foreign currencies are subject to exchange rate fluctuations. Custody and counterparty risks represent further significant risks. We hereby refer to the detailed description of various risks which are included in the prospectus.

Risk Indicator
The historical data used to calculate the risk and return category cannot be used as a reliable indication of the future risk profile. The reported risk and return category may well be subject to change. The lowest risk category cannot be compared with a risk-free investment. There is no capital guarantee or capital protection. The risk of capital loss is borne by the investor.

Breakdown Allocations
Allocation refers to invested fund capital adjusted to 100%. Minor deviations can be caused by rounding errors. The weighting of the money market may include the synthetic exposure from the equity hedging strategy.

Tracking Error
Tracking error describes the volatility of differences in performance between a fund and its benchmark. Tracking error is a measure of the active risk of the portfolio manager. Passively managed funds have a low tracking error.

Volatility
Volatility is a statistical measure of risk which indicates the extent to which the absolute return on an investment or a portfolio fluctuates on average around its mean value in the course of a year.

Sharpe Ratio
The Sharpe ratio is a performance measure which indicates the risk-adjusted excess return (difference between the portfolio return and the risk-free return) compared to the investment risk incurred (volatility).

ISO Certification
Asset Management at Zürcher Kantonalbank is ISO 9001 certified. The ISO 9001 certification guarantees that the authorised user has a management system that meets the requirements of a suitable and recognised standard and has been successfully certified/assessed by the Swiss Association for Quality and Management Systems (SQS).
