Swisscanto (CH) Index Bond Fund World (ex CHF) Govt. (I) NTH1 CHF

swisscanto

Managed by Zürcher Kantonalbank

Bonds | reinvesting | August 2026 - Marketing Material

Fund Description

The objective of the subfund is to track the return and risk profile of the benchmark.

Currency fluctuations between the currency of this share class and the investment currencies of this fund are hedged (portfolio currency hedging)*.

Sustainability Policy

These assets are not managed sustainably. Exclusions in accordance with the Swiss Association for Responsible Investments are applied.

Profile/Suitability

This product is suitable for investors who

- have at least a medium-term investment horizon.
- wish to participate in the development of the global government bond market (excluding Swiss francs) and wish to benefit from the yield potential of the underlying benchmark index. An excess return compared to the benchmark index cannot be expected.

Comments to the Fund

Target Investor Group - Term
Institutional investors with necessary contract

Target Investor Group - Description
N class is offered exclusively to Zürcher Kantonalbank investors with an individual asset management agreement and institutional investors with an individual investments contract, as well as institutional investors of other partners of Swisscanto Fund Management Company Ltd. with the corresponding agreement. An additional requirement is the conclusion of a cooperation agreement. The second letter «T» indicates that the class reinvests profits (accumulating). The designation «H1» in the third position indicates that the class provides for currency hedging (only shown for hedged classes).

Flat Fee (FF)
The AIF is used to compensate the fund management company and fund administration, asset management and - if compensated - the distribution of the fund as well as the custodian bank for the services it provides.

Charging Fee N-Class
The charging fee applied to the N-Classe is shown at a rate of 0%, as the FF is charged in the context of the individual asset management agreement.

Total Expense Ratio (TER)
The Total Expense Ratio (TER) refers to the annual costs that are continuously charged to the fund's assets and is expressed as a percentage of the fund's assets. The figure corresponds to the level of the TER in the most recently completed financial year and does not guarantee a similar level in the future.

Issue and redemption charges in favour of funds ("crossing")
The fact sheet mentions the currently valid and maximum charges incurred. To protect existing investors and cover transaction costs, the fund management credits all issue and redemption charges to the respective sub-fund assets. Issue and redemption charges in favour of the fund are reduced to the extent that issues and redemptions can be offset against each other on a bank working day (known as "crossing"). As a result, charges may be reduced. For further information, see fund agreement.

Swinging Single Pricing (SSP) indirectly
According to fund master data, this fund does not exhibit any swinging single pricing (SSP). However, it cannot be ruled out that an investment is made in a target fund with SSP indirectly.

Benchmarks Disclaimer - CORPORATELSEG is the administrator of certain indices and benchmarks as detailed at https://www.lseg.com/en/ftse-russell/benchmarks.Noother information provided, displayed or contained in any LSEG service is made available for use as a benchmark, whether inrelation to a financial instrument, financial contract or to measure the performance of an investment fund, or otherwise in a way thatwould require the relevant information to be administered by a benchmark administrator pursuant to the Benchmarks Regulation (the"Prohibited Use"). LSEG does not grant rights for you to access or use such information for the Prohibited Use and you may breachthe Benchmarks Regulation and/or any contract with LSEG if you do. In the event that you identify the Prohibited Use of informationby any person, you must promptly notify LSEG and provide such details as we may reasonably request to ensure the cessation ofthe Prohibited Use, where appropriate. Notwithstanding the foregoing, where you have entered into a direct license with a third-partyprovider which permits the Prohibited Use with respect to such third party provider's information, you are solely responsible forcompliance with Benchmarks Regulation and LSEG shall have no liability or responsibility for any loss or damages that arise from orin connection with the Prohibited Use. LSEG and its affiliates do not warrant that any information is provided in compliance with theBenchmarks Regulation and accept no liability and have no responsibility for any loss or damages that arise from or in connectionwith the Prohibited Use of the information. "Benchmarks Regulation" means, in respect of the EEA, EU Regulation 2016/1011, inrespect of UK, UK benchmarks regulation and in respect of another country, the equivalent legislation. If you are in any doubt about the meaning of the Prohibited Use or your obligations under the Benchmarks Regulation, you should seek professional advice.

Explanation of general risks
Investment involves risks, especially with regard to fluctuations in value and return. Investments in foreign currencies are subject to exchange rate fluctuations. Custody and counterparty risks represent further significant risks. We hereby refer to the detailed description of various risks which are included in the prospectus.

Risk Indicator
The historical data used to calculate the risk and return category cannot be used as a reliable indication of the future risk profile. The reported risk and return category may well be subject to change. The lowest risk category cannot be compared with a risk-free investment. There is no capital guarantee or capital protection. The risk of capital loss is borne by the investor.

Hedging
NAV hedging: Currency fluctuations between the currency of this share class and the fund currency are hedged. The objective of NAV hedging is to transfer the performance in the fund currency to the performance of the currency of this share class. Over or under- hedging may occur due to market fluctuations or due to cost considerations.
Portfolio currency hedging: Currency fluctuations between the currency of this share class and the investment currencies of this fund are hedged. The objective of portfolio currency hedging is to hedge the investment currencies of this fund against the currency of this share class. Over or under- hedging may occur due to market fluctuations or due to cost considerations.

Notes on the Breakdowns
– Minor deviations can be caused by rounding errors.

– Currency allocation before currency hedging at share class level.

Breakdown Allocations
Allocation refers to invested fund capital adjusted to 100%. Minor deviations can be caused by rounding errors. The weighting of the money market may include the synthetic exposure from the equity hedging strategy.

Tracking Error
Tracking error describes the volatility of differences in performance between a fund and its benchmark. Tracking error is a measure of the active risk of the portfolio manager. Passively managed funds have a low tracking error.

Volatility
Volatility is a statistical measure of risk which indicates the extent to which the absolute return on an investment or a portfolio fluctuates on average around its mean value in the course of a year.

Sharpe Ratio
The Sharpe ratio is a performance measure which indicates the risk-adjusted excess return (difference between the portfolio return and the risk-free return) compared to the investment risk incurred (volatility).

Modified Duration
The modified duration indicates by how many percent the price of a bond changes if the market interest rate changes by one percentage point.

Time to Maturity in Years
The maturity of a money market instrument or bond is determined based on the earliest possible redemption date. The average maturity of an investment fund is determined by the weighted mean of the maturities of the individual securities from the time of valuation to redemption.

Yield (without currency hedging)
The yield refers to the duration-weighted yield on the portfolio in local currency. No currency hedging is taken into account.

Average Coupon
To calculate the average coupon, the coupons are weighted according to the current outstanding volume of invested bonds.

ISO Certification
Asset Management at Zürcher Kantonalbank is ISO 9001 certified. The ISO 9001 certification guarantees that the authorised user has a management system that meets the requirements of a suitable and recognised standard and has been successfully certified/assessed by the Swiss Association for Quality and Management Systems (SQS).

Reporting
– Analyses and data from MSCI Inc. (www.msci.com) were used to compile this report.
– Allocations by sector and credit rating are categorised according to the index provider.
