Swisscanto (CH) Index Precious Metal Fund Gold Physical NT CHF

Other | reinvesting | August 2026 - Marketing Material

Fund Description

The fund seeks to replicate the performance of gold after the deduction of ongoing costs. The fund invests in physical gold stored solely in Switzerland. There is no debtor risk, since it is a special asset in accordance with CISA. The investor has the option to sell his shares at any time or to request the non-cash payment in physical gold of standard bars of approximately 12.5 kg. Because of the different currency classes, investors can invest in CHF or USD.

Advantages of Precious Metals

Precious metals offer an effective hedge against inflation and protection in times of crisis. Because of their low correlation with traditional investments such as bonds or equities, they provide an ideal means of diversification. Including positions in precious metals optimizes a portfolio and improves its risk-return profile.

Sustainability Policy

This assets are not managed sustainably.

Profile/Suitability

This product is suitable for investors who
– have a long-term investment horizon.
– wish to participate in the development of the gold market.

Further Data

	Fund
Weight per Share (in grams)	2.691
Weight Prec. Metal Deposited (in tons)	4.458

[1] Year/period: Since start performance calculation or at the longest for the last 10 years/periods.

[2] Minor deviations can be caused by rounding errors.

[a] The represented net value development less all regular fund fees due. Any further costs due, which can be charged directly to the fund assets, are disclosed in the fund prospectus.

[b] The gross performance indicated before deduction of any regular fund fees incurred.

Comments to the Fund

Target Investor Group - Term
Institutional investors with necessary contract

Target Investor Group - Description
N class is offered exclusively to Zürcher Kantonalbank investors with an individual asset management agreement and institutional investors with an individual investments contract, as well as institutional investors of other partners of Swisscanto Fund Management Company Ltd. with the corresponding agreement. An additional requirement is the conclusion of a cooperation agreement. The second letter «T» indicates that the class reinvests profits (accumulating).

Flat Fee (FF)
The AIF is used to compensate the fund management company and fund administration, asset management and - if compensated - the distribution of the fund as well as the custodian bank for the services it provides.

Charging Fee N-Class
The charging fee applied to the N-Classe is shown at a rate of 0%, as the FF is charged in the context of the individual asset management agreement.

Total Expense Ratio (TER)
The Total Expense Ratio (TER) refers to the annual costs that are continuously charged to the fund's assets and is expressed as a percentage of the fund's assets. The figure corresponds to the level of the TER in the most recently completed financial year and does not guarantee a similar level in the future.

Issue and redemption charges in favour of funds ("crossing")
The fact sheet mentions the currently valid and maximum charges incurred. To protect existing investors and cover transaction costs, the fund management credits all issue and redemption charges to the respective sub-fund assets. Issue and redemption charges in favour of the fund are reduced to the extent that issues and redemptions can be offset against each other on a bank working day (known as "crossing"). As a result, charges may be reduced. For further information, see fund agreement.

Explanation of general risks
Investment involves risks, especially with regard to fluctuations in value and return. Investments in foreign currencies are subject to exchange rate fluctuations. Custody and counterparty risks represent further significant risks. We hereby refer to the detailed description of various risks which are included in the prospectus.

Risk Indicator
The historical data used to calculate the risk and return category cannot be used as a reliable indication of the future risk profile. The reported risk and return category may well be subject to change. The lowest risk category cannot be compared with a risk-free investment. There is no capital guarantee or capital protection. The risk of capital loss is borne by the investor.

Breakdown Allocations
Allocation refers to invested fund capital adjusted to 100%. Minor deviations can be caused by rounding errors. The weighting of the money market may include the synthetic exposure from the equity hedging strategy.

Volatility
Volatility is a statistical measure of risk which indicates the extent to which the absolute return on an investment or a portfolio fluctuates on average around its mean value in the course of a year.

Sharpe Ratio
The Sharpe ratio is a performance measure which indicates the risk-adjusted excess return (difference between the portfolio return and the risk-free return) compared to the investment risk incurred (volatility).

ISO Certification
Asset Management at Zürcher Kantonalbank is ISO 9001 certified. The ISO 9001 certification guarantees that the authorised user has a management system that meets the requirements of a suitable and recognised standard and has been successfully certified/assessed by the Swiss Association for Quality and Management Systems (SQS).

Reporting
- Analyses and data from MSCI Inc. (www.msci.com) were used to compile this report.
- Allocations by sector and credit rating are categorised according to the index provider.
- Copyright 2026 MSCI Inc. All rights reserved.

Further Specific Explanations
- The value of the gold is calculated based on afternoon closing prices on the London gold market (London, PM Fixing).
- The acquired gold complies with the Good Delivery conditions of the LBMA (London Bullion Market Association), which defines different criteria regarding the trade of gold and silver (for example the minimum quality of the precious metal).
